## SUMMARY

Frontend Developer with 6+ years of experience building responsive, component-based user interfaces. Strong hands-on experience with AngularJS, TypeScript, modern CSS (SASS/LESS), and component architecture. Actively building production-ready applications using React.js, Tailwind CSS, and modern frontend practices through personal projects. Skilled in performance optimization, cross- browser compatibility, and delivering clean, maintainable UI code. Open to global remote opportunities and relocation.

## EXPERIENCE

**Frontend Developer** 08/2021 – 08/2026

*Aditadv Tech Pvt. Ltd.*

- Developed and maintained responsive UI components in AngularJS and TypeScript across multiple product modules, ensuring consistent behavior across devices and browsers.
- Designed and implemented reusable component-based architecture, improving development speed and code maintainability for new features.
- Identified and resolved complex front-end rendering and cross-browser issues in every release cycle, significantly reducing UI-related bugs. Collaborated with designers and backend teams to translate UI/UX designs into high-quality, production-ready interfaces.
- Optimized UI performance on key modules (including Patient Portal), achieving up to 30% faster page load times.

**Web Graphic Designer / Front-End Developer** 06/2020 – 01/2021

*Red Symbol Technologies Pvt. Ltd.*

- WordPress Development: Built and customized responsive WordPress sites to client specifications and modern web standards.
- UI Enhancements: Implemented custom HTML/CSS/Bootstrap styling that improved visual consistency and layout structure across client sites.
- Cross-Browser Bug Fixing: Identified and resolved UI layout and CSS conflicts across browsers, reducing client-reported display issues.
- Reduced page load time by optimizing assets, minifying code, and compressing images across client websites.

**Web Graphic Designer** 08/2019 – 01/2020

*Vaibhav Global Limited*

- Digital Graphic & Event Design: Designed promotional banners and visual assets for corporate events.
- Front-End Implementation: Used HTML/CSS to convert design mockups into functional web elements and support routine site maintenance.

## CORE SKILLS

**Frontend Technologies**

HTML5, CSS3, SASS/LESS, Tailwind CSS, Bootstrap, JavaScript (ES6+), jQuery, React.js, AngularJS, TypeScript, Python (Beginner)

**Tools & Platforms**

Git, GitHub, Figma, Adobe XD, WordPress

**Other Skills**

Component-Based Architecture, Responsive Design, Cross-Browser Compatibility, Performance Optimization, UI Bug Fixing

**Soft Skills**

Analytical Problem Solving, Cross-functional Collaboration, Attention to Detail

## KEY PROJECTS

**Jobnest — Job Portal Platform**

URL:- https://dashish498.github.io/jobnest/

**Tech:** React, Tailwind CSS, HTML5

- Designed and developed a full-featured job portal using React.js and Tailwind CSS, handling the complete frontend lifecycle from wireframing to deployment.
- Built dynamic and reusable UI components including advanced job search filters, application forms, and user dashboards.
- Created responsive, pixel-perfect interfaces with mobile-first approach and cross-browser compatibility.
- Designed interactive prototypes in Figma/XD before development.

### Personal Portfolio Website

URL:- https://dashish498.github.io/portfolio/

**Tech:** React.js, HTML5, CSS3, GitHub Pages

- Architected a dynamic Single Page Application (SPA) to showcase front-end experience, technical skills, and UI/UX capabilities.
- Implemented a modular, Hooks-based component architecture, keeping the codebase maintainable and scalable.
- Designed a mobile-first, fully responsive layout for a seamless experience across devices.
- Deployed via GitHub Pages with optimized asset loading for faster performance.

### Patient Portal

URL:- https://app.adit.com/auth/login

**Tech:** AngularJS, HTML5, CSS3, Bootstrap

- Developed the front-end UI for a comprehensive healthcare patient portal, ensuring secure and easy access to medical records and appointments.
- Optimized UI rendering, improving page load speed by 30%.
- Delivered a highly responsive design for a smooth mobile/tablet experience, increasing daily active user engagement.

### FoodieHub — Recipe Discovery Web Application

URL:- https://dashish498.github.io/Foodiehub/

**Tech**: React.js, JavaScript, Vite, Tailwind CSS, SCSS, React Router, LocalStorage

- Developed a responsive recipe discovery application featuring 20+ recipes across multiple food categories, with dynamic search and filtering by category and dietary preferences.
- Built interactive recipe listing and detail pages displaying recipe information, ingredients, cooking instructions, preparation time, difficulty, and ratings.
- Implemented client-side Login/Signup flows with form validation and LocalStorage-based session persistence, along with a Favorites feature for saving and managing recipes.
- Created reusable React components and responsive UI layouts, and deployed the application using GitHub Pages.

### OkChiller

URL:- https://www.okchiller.com/

**Tech:** WordPress, HTML, CSS, Bootstrap, JavaScript

- Developed the front-end architecture for a commercial/service-based platform focused on user-friendly navigation.
- Delivered a mobile-first responsive design, ensuring 100% usability across all screen sizes.
- Cleaned and minified code, boosting overall performance and site speed.

### Lauren Interiors — Portfolio Site

URL:- https://www.lauren-interiors.com/

**Tech:** Shopify

- Designed and developed a visually rich, high-end portfolio website for an interior design firm to showcase premium projects.
- Implemented smooth scroll animations and an interactive image gallery without compromising site speed.

### Code Review AI — AI-Powered Code Review Application

URL:- https://code-review-ai-rho.vercel.app/

**Tech:** Next.js, React.js, TypeScript, Tailwind CSS, Google Gemini API, Monaco Editor.

- Developed a web-based application focused on AI-assisted code review to help developers analyze source code.
- Designed a developer-focused interface for an AI-powered code review workflow.
- Focused on presenting code analysis and review feedback through a user-friendly interface.

**Target Point Defence**
URL:- https://targetpointdefence.com/
**Tech:** WordPress, Custom HTML/CSS, Bootstrap, JavaScript

- Built an educational platform and coaching institute website covering courses, schedules, and admissions.
- Structured the UI to make information easily accessible, simplifying the student registration process.
- Applied SEO-friendly front-end practices, improving organic visibility for local students.
